

## Aim

- Recognise and show, using diagrams, families of common equivalent fractions.

## Tenths and Hundredths Diving

Look at this grid. Complete the sentences to match the grid.

Each little square is 1 out of 100 and represents the fraction $\frac{1}{\boxed{100}}$.

Each column is $\square$ out of $\square$ and represents the fraction

The columns and rows can also be represented as 10 out of 100 or $\frac{10}{100}$

U

## Tenths and Hundredths Diving

Look at this grid. Complete the sentences to match the grid.

There are 40 squares shaded out of 100.
This represents $\frac{40}{\overline{100}}$.

There are 4 rows shaded out of 10.

This represents 4
10

Tenths and Hundredths Diving
Look at this grid. Complete the sentences to match the grid.

There are 26 squares shaded out of 100 .

This represents $\frac{26}{100}$.

Choose the correct fraction to match the statement. How do you know you have chosen the correct one?

On my hundred square, 5 rows have been shaded plus 4 extra squares.

It has be this one as 5 rows of 10 is 50 . If you add on the 4 extra, that gives you 54 out of 100.

Tenths and Hundredths Diving
Complete the part-whole model.

Tenths and Hundredths Diving
Use the part-whole model to partition the fractions.
a) 60 hundredths

b) 41 hundredths

Mandeep is explaining what this grid shows. Is she correct? Explain your answer.

|  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

There are two rows and 3 extra squares shaded which represents $\frac{23}{10}$.

Mandeep is incorrect. There are 23 shaded squares but it does not represent $\frac{23}{10}$, it represents
23 hundredths. This would be written as $\frac{23}{100}$.

$\square$

What is missing? Explain your reasoning.
$\frac{67}{100}$ is missing because $\frac{6}{10}$ represents 6 rows of 10 squares shaded, which makes

60 squares, and $\frac{7}{100}$ represents 7
individual squares shaded. $60+7=67$.

$$
\begin{array}{l|ll}
\frac{6}{10} & \frac{67}{100} & \frac{7}{100}
\end{array}
$$

|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

## Deeper

Who has the least? Explain your answer.
(1) Who has the least? Explain your answer.

I have 5 hundredths and 3 tenths.

## Jenny

Dhruv has $\frac{53}{100}$.
I have fifty three hundredths.

Read each child's statement and match them to the correct fraction.

| $\frac{78}{100}$ | $\square$ | $\frac{68}{100}$ | $\frac{8}{100}$ |
| :--- | :--- | :--- | :--- |
