

# Assemblage art

L.O. USE SOME OF THE IDEAS OF ARTISTS STUDIED TO CREATE PIECES

# Assemblage art – What is it?

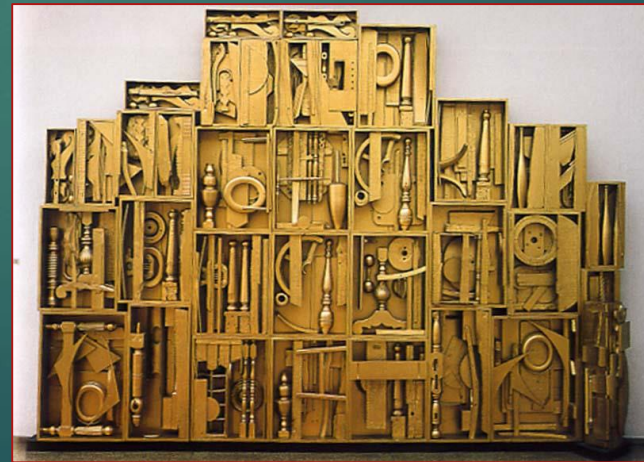

- ▶ Assemblage art is when artists assemble (bring together) different objects to create their piece. These objects can be bought specially or scavenged (found).
- ▶ It was started over 100 years ago.
- ▶ It is a little bit like a collage using 3D objects.
- ▶ Artists choose all sorts of different materials to be in their art.

# Who makes it?

There are lots of assemblage artists out there. Some more notable ones are:

- ▶ Kurt Schwitters
- ▶ Pablo Picasso
- ▶ Louise Nevelson
- ▶ Betye Saar
- ▶ Hideki Kuwajima

We are going to make our own assemblage piece.

Use things you have found around the house to make your composition. How many different materials can you use?

You don't need to glue them down as long as you can photograph them in the right place.

You might want to put your art into a box or maybe make a frame to go around it. You might even want to paint it all the same colour (just make sure they're objects you're not too bothered about!).
