L.O. to observe and record changes over time

As a class, we created our own sundial based on the ancient Egyptian design! We learnt about the ancient Egyptian belief about the sun god Ra, moving across the sky and being swallowed by the sky goddess Nut each evening!

As the sun moved across the sky, we observed changes over time, looking at the position of the shadow to indicate the time of day. We recorded our findings and thought carefully about which direction the shadow moved and if the hourly markers were evenly spaced.
